

KS1 half term SUBJECT OVERVIEW— AUTUMN 1 2019

Literacy— will focus on stories with familiar settings and themes that are familiar to the children, for example home, school and making friends, linking with PHSE and feelings. Children will consider the grammar rules for writing and sequences of stories and begin to use these in their own writing. In addition we will look at facts and the structure of non-fiction writing, finally focussing on Harvest time and the activities linked to this.

PHSE Children will be taught to recognise and respect differences, what is fair and unfair, choosing between right and wrong. They will think about their feelings and learn to deal with them in a positive way, considering how their behaviour can affect others. They will learn how family and friends should care for each other.

PE Children will learn basic PE skills through playing games, using observation, peer and self-assessment.

Numeracy— **Y1**: will focus on exploring place value, including counting to and across 100, forwards and backwards, identifying one more/less, number bonds to 10, then 20, measuring and comparing heights and sequencing time: days and months.
Y2: comparing and ordering 2 digit numbers, partitioning numbers, comparing and sequencing intervals of time, using number bonds to solve addition and subtraction problems, adding three single digit numbers, adding and subtracting multiples of 10s and exploring properties of shapes including lines of symmetry in 2D shapes.

All About Me!

Art/DT We will observe ourselves and each other carefully, use a variety of materials and techniques to create portraits and learning about the artist Picasso. Children will also use printing to explore shape, form and pattern and use their imagination to create pictures.

History/Geography

Children will learn about their own locality and look at landmarks and how they are represented on a map, learning basic skills for map reading and directional language including the points of the compass.

Science will develop children's understanding of how we change as we grow older in terms of how we look and what we are able to do. Working scientifically, children will group and classify, carry out comparative tests and observe changes over time, noticing differences and similarities. We will also look at how hygiene plays a part in keeping healthy.

RE Children will discuss the concept of belonging and family, learning about the values of the Christian Church and the importance of the Bible to Christians. They will listen to some of the parables in the Bible and will think about how these are relevant today in their own lives. We will find out about how Harvest is celebrated in Church and try to arrange a visit to the Cathedral.

MUSIC is an integral part of our curriculum and will be included in most subjects. Children will be learning songs relating to topics studied, and learning and performing songs at our concerts and festivals throughout the year.

ICT will be used to compliment teaching in most subjects in the curriculum throughout the year. Children will use computers to research information, to write, draw and learn basic programming skills.

FRENCH French will aim to lay the foundations for achievements against the language objectives in the KS2 language framework. This term pupils will use language around the topic of "myself", learning names for body parts, colours and numbers through activities, stories and songs. They will also take part in our annual European Day where we will be enjoying a day of activities in French relating to the world of work.

Reception children will be taught alongside Y1/Y2 children but will focus on the Early Learning Goals which are interrelated and overlap and can take place in any area of the above curriculum areas.
